

# Heaven Horoscopes For Real People On Earth

by Amy Herring

This month *New Spirit Journal* introduces a new monthly feature: an astrology column written by Amy Herring who has been an astrologer for the past ten years. Let us know how you enjoy this new feature.

The way newspaper horoscopes are calculated is a lot more "one-size-fits all" than a reading of a personal birth chart, but they can be worth reading. To use these horoscopes effectively, consider the horoscope for your rising sign in addition to your sun sign.

## ★ Aries ★

Your life seems to pick up speed after the first week of August. There is so much to see and do, you might feel like you need two of you to take advantage of all the opportunities in front of you now. Be careful you don't convince yourself that you can say yes to everyone. Too much of a good thing will leave you exhausted and tense. Set some limits.

## ★ Taurus ★

Where are you from? It sounds like such a simple question, but you are being made aware of its deeper meaning as you observe the patterns of behavior that you have inherited. Go through the attic in your mind this month. Is it time to let some things go that you've outgrown? Keep the memories but ditch the crutches. It does matter where you've come from, but it matters more where you're going.

## ★ Gemini ★

Issues that seem well in hand as the month begins may unravel in the last week. It

may be revealed that neither you nor someone close to you is who the other thought they were. They may think they have the moral high ground and you may have mad debating skills, but the truth will not be discerned by the winner of the argument. Turn inward and you will have a better chance of finding it.

## ★ Cancer ★

Are you? Is it? What if? Questions, questions. Your self-review continues as now you question your own worth. You really are more capable than you know, as long as you continue to participate in life. Faith in yourself can go a long way. The lunar eclipse on the 28th heightens your sensitivity, so go easy on yourself and enjoy your friends and family with a celebration. If you can, consider taking a little get-away, if doing so won't add to your stress.

## ★ Leo ★

A new you wants to emerge this month, but it's actually an old you, an ancient you. Primal self has the power and the hunger; Higher self has the vision. Get these two selves together this month and focus your energy on your loftiest spiritual goal. The full moon at the end of August should see your soul's burden a bit lighter. Happy birthday, Leo! Consider a birthday reading to set your intentions for your personal year.

## ★ Virgo ★

That distant voice calling you into spirit is joined by other voices this month, and you may find it quite distracting! That's okay

because it's got something important to say. Whatever it is will start to become more conscious from the 19th. As this realization dawns, you'll likely feel caught between two conflicting desires. You may be tempted to make a quick and bold move, but be careful that it's not the wrong one.

## ★ Libra ★

Determination? Check. List of sensible justifications? Check. At peace with the decision in your heart? Hmm... As your ruler turns backwards, you are asked to reconsider. Is it because you are going in the wrong direction? Or is it just a chance to make peace in your heart with decisions already made? You're always of two minds, but the mind won't tell you much about the heart. By mid September, you'll know which it is.

## ★ Scorpio ★

You are leading a charmed life this month, but can you enjoy it? Half the planets are lining up to pat you on the back, but I know you're wondering what the other half of the

sky is up to. Don't be so quick to mistrust your good luck. The only one who can sabotage that is you. Bet big on yourself. Any work you do to better yourself is supported and will have longterm, visible effects.

## ★ Sagittarius ★

The first two weeks of August are a great time for you to get away from it all, but make it more than a vacation; make it a spiritual journey, for what you need now is new perspective. The last two weeks may bring a standoff with an important person in your life. Attack the problem, not the person, because a battle of wills will distract you from the real issue and make things worse very quickly.

## ★ Capricorn ★

Your outer life may be business as usual, but your inner life is very active this month. It might feel like something deep inside is waking up, like a foot that has fallen asleep and
