

# Tap into the Higher Powers of a Stone Used By The Maya

By Deanna Emerson

Deep in the tangled jungles of Belize, in Lubaantun, City of Fallen Stones, Anna Marie Le Guillon, adopted daughter of Frederick Mitchell-Hedges – self proclaimed archaeologist and poet – scrambled along the highest ridge of a pyramid on her 17th birthday, in 1923. When suddenly, the brilliant glare of an unknown object, deep within the bowels of the ancient ceremonial temple caught her attention. Sent to retrieve the mysterious artifact by her father, Sammy, as she was called, returned to the surface covered with dust, bearing the priceless relic known today as the Mitchell-Hedges Crystal Skull.

In the latest movie, "Kingdom of the Crystal Skulls," Indiana Jones goes in search of yet another head of crystal, just as Anna's father had done in the land of the Maya, known for their use of a "Sastoon," a stone that heals. And indeed crystal does heal, as I personally discovered on many occasions as I shared photographs of the M. H. Crystal Skull with television viewers, and in speaking events all over the country.

Spontaneous healings occurred instantly in some cases, as slides of the crystal skull flashed before audiences of fascinated individuals, while others took place on a subconscious level, healing emotional trauma and other more personal issues. Many healings occurred as I sat beside Anna while she shared the healing energy of the M. H. Crystal Skull with individuals and groups, at peace conferences in Canada.

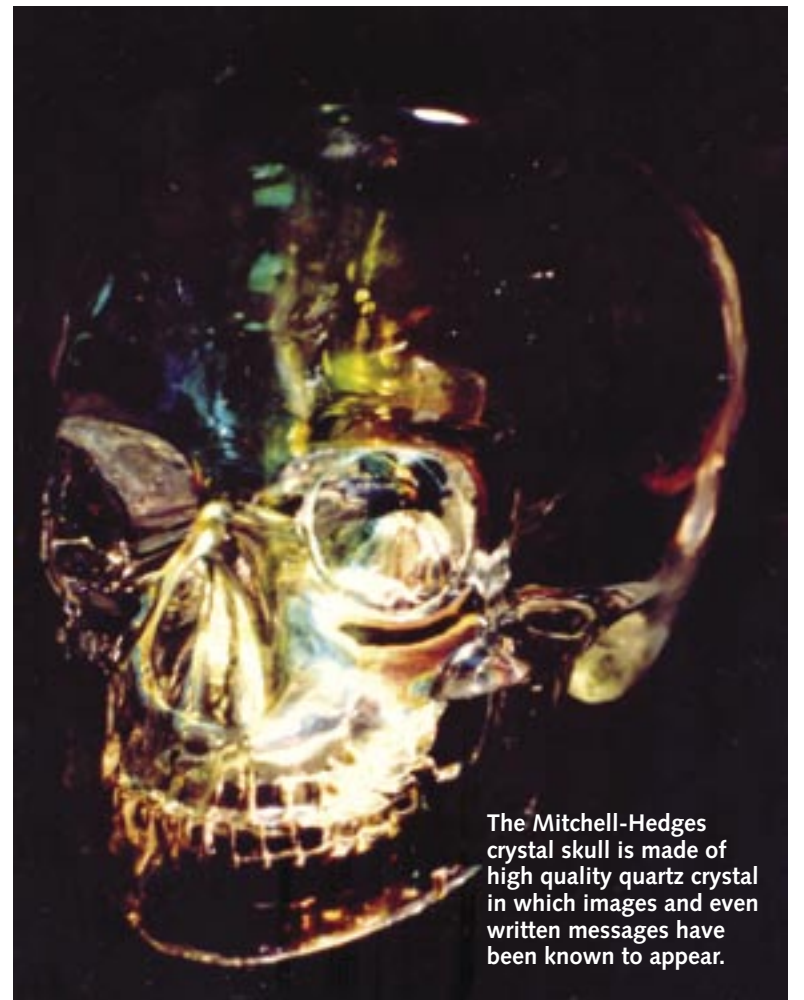

My journey to visit Anna Mitchell-Hedges and the crystal skull, in 1985, began with a dream, a dream in which a mystical object bathed in glowing blue light appeared before me. Surrounded by an illuminated field of energy – pulsating particles and waves of amber light

– the three dimensional holographic image, barely discernable behind a veil of mist gradually began to clear. Within seconds there appeared before me two luminous and questioning eyes, gazing directly into mine, each pupil a pinhole of white light. The instant our eyes met, the enigma disappeared into the background of my busy day to day life. I woke, as the sun floated up over the ledge of the world, well aware that my life would never again be the same.

As I lay dreaming of the mystical treasure before me, the enigmatic object that appeared to be an ordinary head of glass, I grew to understand that, instead, this was an exquisitely carved head of crystal, inexplicably clear, transparent as one's soul. And that within this head of crystal, deep within the crystalline structure, was the key to unlocking the higher powers of consciousness, to access the energy of light used as a healing tool. And as I was soon to discover, getting to know Anna and working with the crystal skull raised far more questions than answers.

Is the M. H. Crystal Skull an ageless form of advanced computer, as my research reveals it may be, one that will boot up once an individual has programmed the mysterious treasure with the right program, desires, or thoughts? Or, is the crystal skull much more than a computer, completely

Continued on Page 10

The Mitchell-Hedges crystal skull is made of high quality quartz crystal in which images and even written messages have been known to appear.
