## Not a Drop to Drink America's Water Crisis (and what you can do) by Ken Midkiff New World Library

According to Ken Midkiff, our life-sustaining friend, water, is becoming scarcer and may become even more scarce if we don't take swift action to preserve it. In this book, Midkiff outlines the events and situations that are conspiring to dry up our supply of this essential life-giving resource.

This book focuses less on long showers and shaving with the water running than on the big offenders, namely agribusiness and misappropriation of existing water resources by short-sighted politicians. Using well-referenced historical examples of water blunders and forecasted population increases, Midkiff makes the case that without intelligent intervention and appropriate conservation measures, American is headed for a serious water crisis.

There is a "What can you do" section at the end of each chapter so readers can be part of the solution rather than merely witnessing the problems.

**Clean Sweep  
Banishing Everything  
You Don't Want to Make  
Room for What You  
Want  
by Denny Sargent  
Weiser Books**

Written by local author

Denny Sargent, Clean Sweep is one of those fun books that is full of great ideas and techniques to help you live a healthier and happier life. We all have things, thoughts, habits, and people we would like to have out of our lives. From losing weight to getting over the breakup of a relationship, this book gives you practical techniques to banish these from your life.

Sargent explains the actual technique of banishing as well as exploring the philosophies, ideas, and theories about banishing in four main areas of our lives: the body and physical/material; the heart, emotions, and feelings; the mind; and the spirit or energetic world.

The author explains, "You will find techniques and strategies powered by love and will to get rid of those things holding you back and making your life less than it could be. These techniques are drawn from a variety of cultures and traditions and organized by the very ancient concept of the five elements: air, fire, water, earth, spirit."

As a result of reading this book, you will probably find yourself drawn to more than one banishing at a time and will most likely begin to make it a regular part of your life.

**The Virtuous Consumer  
Your Essential Shopping  
Guide for a Better,  
Kinder, Healthier World  
by Leslie Garrett  
New World Library**

If you want to live a greener, cleaner, life and would like some pointers to get started, this is the book for you. The author wrote this book for people who want make better consumer choices, but find it a daunting task.

Each chapter in this book reveals how a particular business sector — say, the garment industry or building products or appliances — impacts the planet and its people. Those who want a greater understanding of the issues can read the whole book, while others can turn directly to the "Purchase Power" section at the end of

each chapter. This states clearly and succinctly what to put on your shopping list.

The book is sprinkled with bizarre trivia, fascinating personality profiles, and quick tips, all focused on living a greener, cleaner life. The author is well-informed and writes with a compassionate and friendly voice rather than trying to shame people into making better choices.

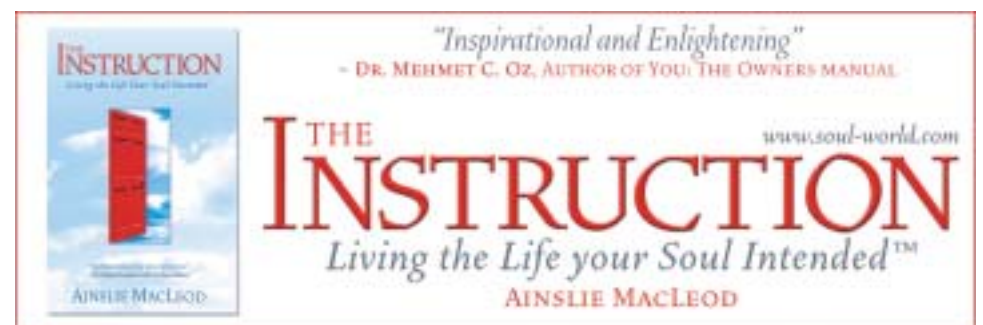

**The Instruction  
Living the Life Your Soul  
Intended  
by Ainslie MacLeod  
Sounds True**

Many people spend a long time trying to find their life purpose. Regretfully, some people are never able to hone in on this. The Instruction will help you out. It offers a step-by-step program for discovering the life plan your soul created before you were even born. It shows you how to determine your soul age, type, powers, and talents and then helps you decide how to best use all of this information.

This local author uses his connections with spirit guides and his psychic abilities to explore the world of our souls and purposes.

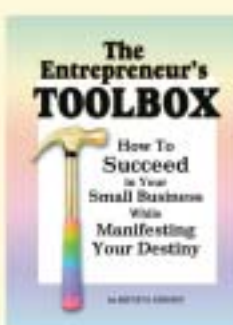

One of the things I most like about the book is that it is written in a very clear, friendly, and useable style. The inclusion of many examples from the lives of other people also brings the concepts to life.

Even if you think you know your life purpose, you will enjoy this book for its different sort of approach to the issue.
